TradeLoop

The Daily Micro-Skill Marketplace

AGILE TEAM CHARTER

Subject	Project Presentation 3
Institution	Cape Peninsula University of Technology
Document	Agile Team Charter

Member Name	Role	Student No.
Precious L Mtsweni	Team Leader / Presenter	230604048
Ntombenhle Majali (second year)	Writer / Editor	222106956
Stephen Hendricks	Designer	222774703
All Members	Researcher	N/A

TEAM PURPOSE

Our Objective

The main goal of our team is to design, validate, and present a market-ready solution that addresses the unemployment and skills-access problem in underserved township communities. Specifically, we aim to develop a hyperlocal mobile platform that connects skilled informal workers with households that need small tasks completed (TradeLoop concept) and to demonstrate through research and evidence that this is a real, validated opportunity worth pursuing. **Our Vision Statement**

> ***"Our vision is a community where no skilled person goes unnoticed and no household waits too long for help. TradeLoop succeeds when daily micro-work becomes a consistent, trusted, and dignified income stream for workers in Khayelitsha and communities like it across South Africa."***

TEAM ROLES AND RESPONSIBILITIES

Our team of three members each carries clearly defined roles to make sure the project stays on track.

Role	Name & Surname	Student No.	Key Responsibilities
Team Leader	Precious L Mtsweni	230604048	Overall coordination, decision-making, deadline management and stakeholder communication
Researcher	All Members	N/A	Primary research design, survey distribution, data collection and analysis
Writer / Editor	Ntombenhle Majali	222106956	Documentation, report writing, referencing and editing for quality and consistency
Presenter	Precious L Mtsweni	230604048	Slide preparation, speaker notes, demo planning and presentation delivery
Designer	Stephen Hendricks	222774703	Branding, visual layout, infographic design and document aesthetics

TEAM VALUES AND PRINCIPLES

Core Values

These are the values we agreed on as a group that will guide how we work together throughout this project:

- Collaboration: We treat every idea as a team contribution, Decisions are made together, and no one carries the whole load.
- Respect: We listen to each other, honour different perspectives, and never dismiss a contribution without reason.
- Transparency: We keep each other updated on progress and challenges. No one should be surprised by a missed deadline or a quality issue.
- Accountability: We each own our role and take responsibility for our deliverables. If something goes wrong, we fix it together rather than deflecting blame.
- Continuous improvement: After each submission or sprint, we reflect on what worked and what we need to do better next time.

Agile Key Principles We Follow

We have grounded our teamwork in the following Agile principles, which we believe are directly applicable to a student project environment:

- Deliver working value early: Our survey was designed and executed in 3 days so we could have real evidence before writing conclusions.
- Welcome changing requirements: As we gathered data, we adjusted our problem framing and solution without discarding prior work.

- Build around motivated individuals: Each role was assigned based on genuine strengths, not just filling slots.
- Regular reflection and adaptation: After each deliverable phase, we do a brief retrospective to improve as a team.
- Simplicity: We focus on what is needed for each deliverable and do not overcompensate our outputs.

COMMUNICATION PLAN

Channel	Purpose	Who Uses It
WhatsApp Group	Day-to-day updates, quick decisions, file sharing	All members
In-person Meetings	Sprint planning, reviews, problem solving	All members
Google Drive	Document storage, version control, shared resources	All members
Google Forms	Survey creation and data collection for research	Researcher role
Email	Formal communication with lecturer if needed	Team Leader

Meeting Frequency and Structure

- Sprint Planning Meeting — Once per deliverable cycle, before work begins.
  — Agenda: divide tasks, agree on deadlines, and clarify requirements.

- Check-in / Stand-up — Twice per week via WhatsApp voice note or short video call.
  — Each member answers: What did I finish? What am I working on? Is anything blocking me?

- Review Meeting — One day before each submission.
  — Agenda: review the full document together, give feedback, and finalise the version to submit.
- Retrospective — After each submission, we discuss what went well and what we will change for the next sprint.

- If a member cannot attend a meeting, they must send a written update to the WhatsApp group at least 1 hour before the meeting starts.

GOALS AND MILESTONES

SMART Goals

Goal 1 — Community Problem Validation

To conduct a structured community survey with a minimum of 20 respondents from Khayelitsha Site C and present validated evidence of the problem within 3 days of the survey launch. [Status: Completed — 21 respondents, 100% problem confirmation]

Goal 2 — Business Idea Development

To develop a clearly defined business concept (TradeLoop) with a named target market, revenue model, and value proposition. [Status: Completed]

Goal 3 — Prototype / MVP Design

To produce a functional wireframe or clickable prototype of the TradeLoop app by the date set for Deliverable 2, demonstrating the core user flow for both consumers and skilled workers.

Goal 4 — Presentation Delivery

To deliver a confident, well-structured group presentation of the TradeLoop project covering problem, evidence, solution, and business model within the allocated time slot, with all members contributing.

Goal 5 — Academic Quality

To achieve a minimum group average of 70% across all deliverables by maintaining consistent referencing, clear writing, and evidence-based argumentation throughout all submissions.

Project Milestones

Milestone	Description / Deliverable	Target Date
M1	Community survey designed, distributed, and completed (min. 20 responses)	12 March 2026
M2	Deliverable 1 submitted — Community Problem + Opportunity Validation report	13 March 2026
M3	Team Charter finalised and approved by all members	03 May 2026
M4	Prototype / wireframe of TradeLoop app designed and reviewed	To Do
M5	Deliverable 2 submitted — full solution and business model document	To Do
M6	Final presentation rehearsed and delivered to class	To Do

TEAM CHARTER AGREEMENT

By working under this charter, all members of TradeLoop Group 6 agree to uphold the values, roles, communication norms, and goals set out above. We understand that this charter exists to protect everyone's contribution and to keep the team focused, fair, and accountable.

Member Name	Role	Student No.	Signature / Acknowledgement
Precious L Mtsweni	Team Leader / Presenter	230604048	Agreed
Ntombenhle Majali	Writer / Editor	222106956	Agreed
Stephen Hendricks	Designer	222774703	Agreed
All Members	Researcher	N/A	Agreed
